

RSL *Repair & Supplier Logistics*

At Pratt & Whitney's Repair & Supplier Logistics, we understand time is critical in the airline industry. Searching for a repair supplier, or negotiating the details of a contract while parts linger on a dusty shelf, will not allow you to succeed in this competitive environment. We can simplify your supply chain, lower your overall cost of ownership and enhance your efficiency. And, we put 85 years of jet engine experience behind the workmanship of parts with a standard Pratt & Whitney warranty.

Whether you are looking for a single component repair or a complex package of parts, we provide an experienced customer support team who will work closely with you to understand your needs. We manage relationships with a global network of over 200 highly qualified repair sources and trustworthy suppliers. So you don't have to. We continually work with these partners to reduce turnaround time, trim costs and maintain the highest quality standards.

Pratt & Whitney Repair & Supplier Logistics is positioned as an OEMRO[®] solution that brings the engineering excellence of an OEM with the flexibility, lean thinking, and customer focus of an MRO. If common repairs don't address your requirements, our repair development engineers will work to create innovative solutions so your parts can be quickly returned to service.

We've created a one-stop shop for repair and logistics solutions that benefits from our global network of highly qualified repair sources. Let us handle the logistics of your repair needs.

Simple, efficient, trustworthy and innovative: Contact us today to begin applying these words to your repair sourcing supply chain.

Pratt & Whitney. **It's in our power.**[™]
