

Tool Support Services

Dependable Tools for Dependable Engines

Pratt & Whitney Tool Support Services offers airline and repair facility customers a complete line of aircraft engine tools and engine ground support equipment (GSE) for all maintenance operations. We provide quality products at competitive prices, delivered in a timely manner. Our tools support all Pratt & Whitney commercial engines for business and regional aircraft, as well as International Aero Engine's V2500 engines.

The tools we sell are identical to those that Pratt & Whitney uses to assemble and maintain its own engines. Quality is unmatched—and reliable, durable performance is assured. All tools are thoroughly inspected and calibrated to exact measurement standards for repeatable performance.

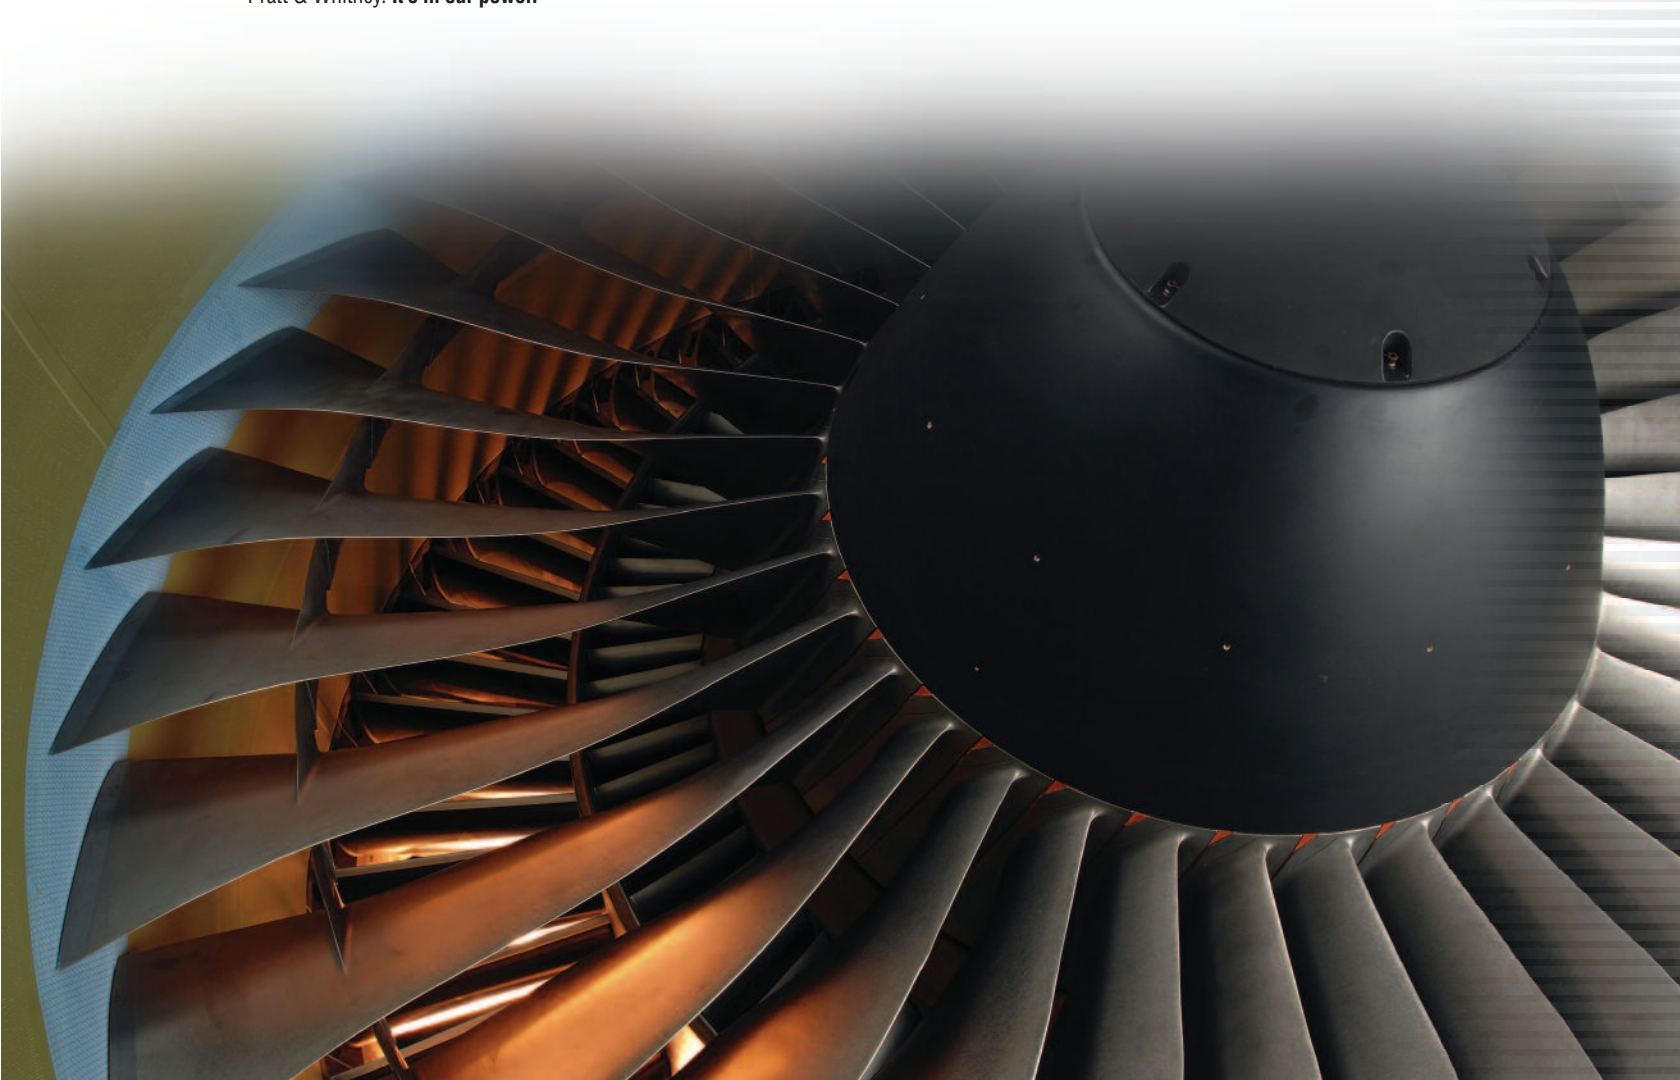

Whatever your present level of maintenance activity, we can support your engine tooling and support equipment requirements. We also provide assistance in updating existing engine maintenance equipment or planning on future expansion of your capabilities. We look forward to the opportunity to provide our products and services to you.

Pratt & Whitney. **It's in our power.™**

We provide unmatched products and services that meet each customer's specific requirements.

- Tooling manufactured to the current design specification
- Line maintenance tooling and equipment
- Equipment transport stand and engine split-ship systems
