Support Equipment Sales

Support Equipment for All Pratt & Whitney Military Engines

Pratt & Whitney Military Support Equipment (SE) Sales supports all Pratt & Whitney Military Engines for any fleet size or repair level. Military SE Sales provides the same tooling used to assemble and maintain engines at Pratt & Whitney facilities worldwide, including a full line of specialized tools for engine maintenance. Products and packages available include basic tooling, ground-support equipment, engine inspection and test equipment, all designed to meet customer needs. Our extensive range of test equipment provides our customers with a variety of engine maintenance and inspection options and a full range of diagnostic equipment, including component and accessory testing.

Ground Support Equipment & Engine Tooling

In addition, Military SE Sales offers a complete line of ground-support equipment for Pratt & Whitney-powered military fighter aircraft, including engine transport systems, engine split-ship systems, module storage and transport containers.

Comprehensive Product Line

- Assembly, disassembly and line maintenance tooling
- Cleaning, inspection and diagnostic equipment
- Engine-test-cell-associated equipment, including training and correlation
- Tooling for inspections, borescopes and balancing

World-Class Quality & Customer Satisfaction

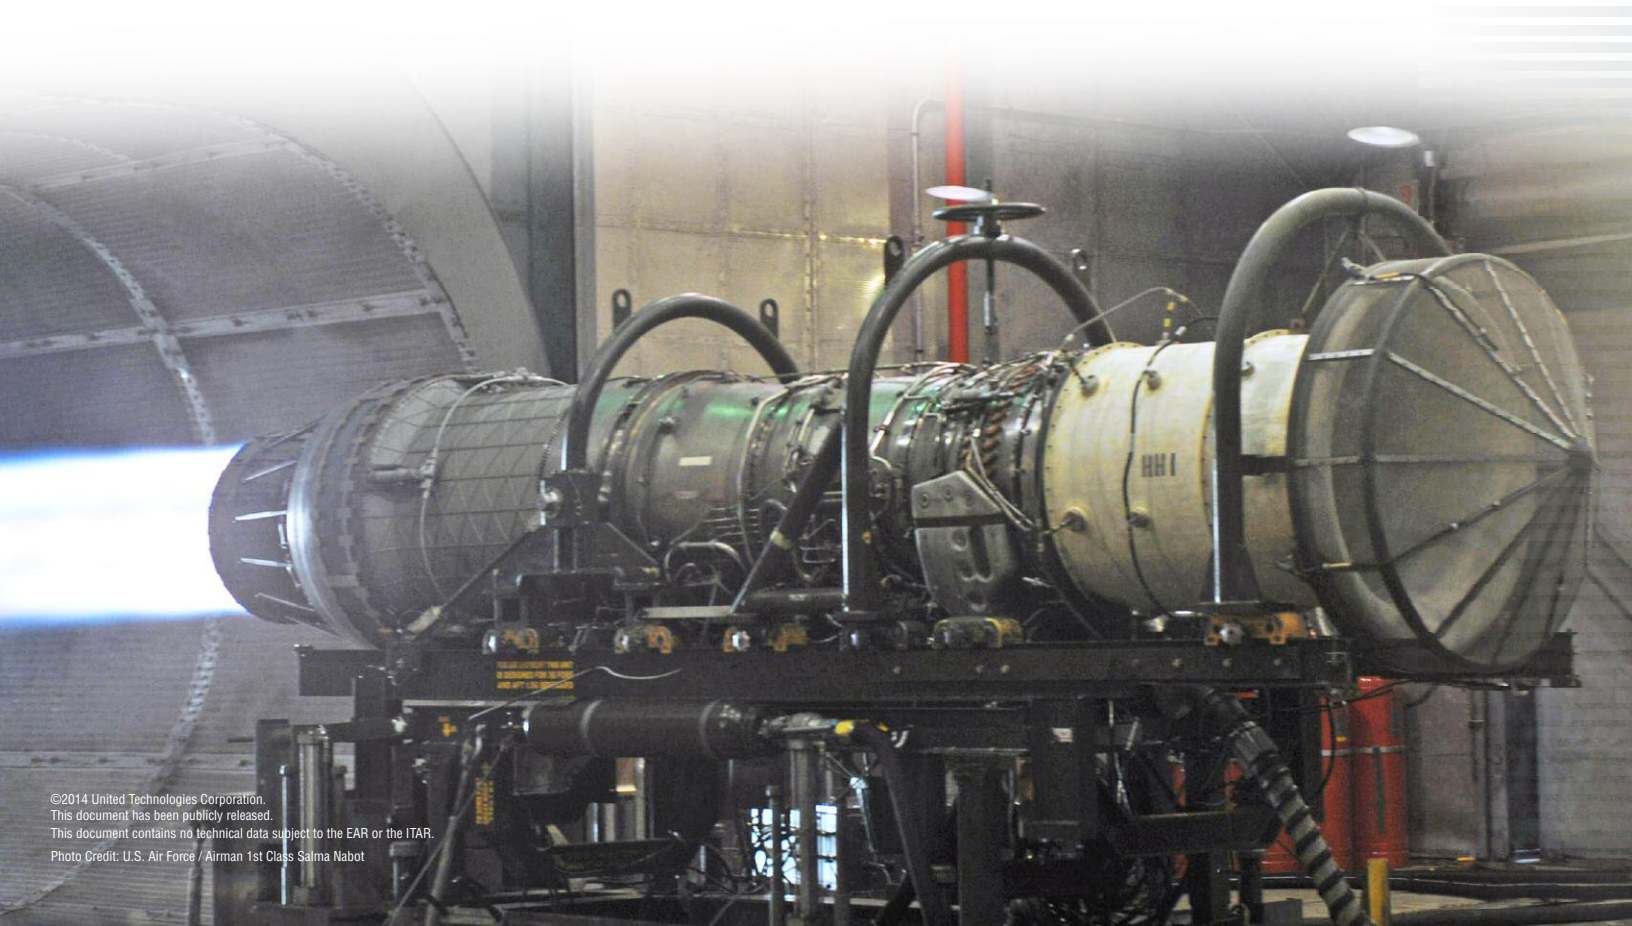

As the original equipment manufacturer, Pratt & Whitney can rely on more than 87 years' experience to provide solutions that will satisfy the requirements of any customer.

Products are designed to provide reliable performance and years of dependable service, supported by a team of experienced customer service and engineering professionals.
