EAGLE SERVICE™ PLAN

NO SURPRISES

ENHANCE YOUR CREDIBILITY

We know that corporate flight departments work hard to control maintenance costs within their organizations. Our ESP® program helps to build credibility by virtually eliminating the risk of high-cost surprises, making maintenance expenses more predictable and ultimately enhancing aircraft resale value.

SO MANY BENEFITS

Our ESP® program is the most comprehensive corporate engine service program available today – and it's the benchmark for engine maintenance financial planning.

- Predictable engine maintenance expenses, providing you with effective budgeting and cash flow
- Virtually eliminates high-cost surprises
- Transferable on resale to subsequent operators
- Renewable at the end of the contract term
- A portable asset that enhances aircraft resale appeal and value
- Early enrolment discounts available
- 24/7 customer service for peace of mind

CHOOSE THE OPTION THAT MEETS YOUR NEEDS

The ESP® program offers a number of optional engine maintenance plans for the operator of selected P&WC engine models. Each plan is priced at a fixed rate per flight hour, which is based on the expected cost of operating a mature engine. The operator pays a monthly amount, based on the number of hours flown in a given month, multiplied by the applicable dollar rate per hour. Choose the option that best suits your individual requirements.

There are four plans to choose from: Gold, Gold Lite, Silver and Silver Lite. The Silver and Gold plans include the costs for Life Limited Parts replacement which are not included in the Lite plans. Additionally, both the Gold and Gold Lite plans include the following additional coverage:

- Line removal / installation / access labor for both engine and accessories
- Freight coverage for the engine, engine parts and accessories
- Mobile Repair Team support for AOG's
