FLEET MANAGEMENT PROGRAM

FOCUS

ON YOUR CORE BUSINESS

There's no question engine maintenance is a necessity, but managing it takes time and planning. Fortunately, Pratt & Whitney Canada's FMP® program for fleet management offers an easy alternative.

SO MANY BENEFITS

Enroll in the FMP® program and say goodbye to unpredictable prices and ups and downs in maintenance costs.

- You get long-term engine maintenance cost protection
- You gain an effective budgeting tool
- The plan minimizes your involvement in maintenance matters, saving you time and allowing you to concentrate on your core business
- Your engine maintenance needs are addressed with maximum speed and focus by P&WC engine maintenance personnel, the people who know your engine best
- The plans are customized to your fleet's flying profile
- A knowledgeable P&WC customer manager will help you manage your maintenance
- 24/7 customer service available for peace of mind

CHOOSE THE PLAN THAT'S TAILORED TO YOUR NEEDS

Pay by the hour with a term cost plan

The TCP® maintenance plan is our customized pay-by-the hour support plan that can include support services that you select from a comprehensive menu:

- Engine overhaul / major engine refurbishment
- Hot Section Inspection (HSI)
- Basic Unscheduled Removals (BUR)
- Low Cycle Fatigue (LCF) component replacement
- Fuel nozzle refurbishment
- Rental and spare engines
- Accessory BUR coverage

Under the TCP® maintenance plan, you pay a guaranteed hourly rate per engine flying hour, on a monthly basis, for support services you select from the above menu.

Pay at the shop visit with an event cost plan

The ECP® plan is our customized maintenance plan under which you pay, at each shop visit, an amount equal to a predetermined hourly rate per engine operating hour multiplied by the engine operating hours since the last shop visit for maintenance services selected. This allows you to have a guaranteed maintenance cost for the life of your engine.
